

Public Report: Gold Resource Estimate - Knight-Martin (South Annette Project)

Prepared for: Knight-Martin
Project: South Annette Project
Date: 14 February 2026
Classification: INTERNAL

Document Type	JORC
Commodity	Gold
Organisation	Knight-Martin
Project / Operation	South Annette Project
Prepared By	Justin Freeman
Reviewed By	Jessica White

1. Executive Summary

This report outlines the mineral resource estimate for the South Annette Project project.
The estimation was conducted in accordance with the JORC Code (2012 Edition) regarding Gold.

2. Geology and Mineralisation

The deposit is characterized by toward-hosted mineralisation within a its sequence.
Structural controls include stratigraphic pinch-outs.

3. Sampling and Sub-sampling Techniques

Sampling was primarily achieved via Reverse Circulation drilling.

Samples were split using a riffle splitter to ensure representative sub-sampling for assaying.

4. Estimation and Reporting of Mineral Resources

Ordinary Kriging was utilized for the Gold grade interpolation.

Cut-off grades were determined based on current economic assumptions and metallurgical recovery rates.
