

Public Report: Iron ore Resource Estimate - Wyatt-Huynh (West Elainefurt Mine)

Prepared for: Wyatt-Huynh
Project: West Elainefurt Mine
Date: 21 January 2026
Classification: CONFIDENTIAL

Document Type	JORC
Commodity	Iron Ore
Organisation	Wyatt-Huynh
Project / Operation	West Elainefurt Mine
Prepared By	Dawn Holt
Reviewed By	Aaron Cunningham

1. Executive Summary

This report outlines the mineral resource estimate for the West Elainefurt Mine project.

The estimation was conducted in accordance with the JORC Code (2012 Edition) regarding Iron Ore.

2. Geology and Mineralisation

The deposit is characterized by speech-hosted mineralisation within a return sequence.

Structural controls include faulting.

3. Sampling and Sub-sampling Techniques

Sampling was primarily achieved via Reverse Circulation drilling.

Samples were split using a riffle splitter to ensure representative sub-sampling for assaying.

4. Estimation and Reporting of Mineral Resources

Ordinary Kriging was utilized for the Iron Ore grade interpolation.

Cut-off grades were determined based on current economic assumptions and metallurgical recovery rates.
