

Public Report: Gold Resource Estimate - Wyatt-Huynh (Emilyside Project)

Prepared for: Wyatt-Huynh
Project: Emilyside Project
Date: 11 January 2026
Classification: RESTRICTED

Document Type	JORC
Commodity	Gold
Organisation	Wyatt-Huynh
Project / Operation	Emilyside Project
Prepared By	Ashley Rodriguez
Reviewed By	Peter Williams

1. Executive Summary

This report outlines the mineral resource estimate for the Emilyside Project project.

The estimation was conducted in accordance with the JORC Code (2012 Edition) regarding Gold.

2. Geology and Mineralisation

The deposit is characterized by more-hosted mineralisation within a crime sequence.

Structural controls include shear zones.

3. Sampling and Sub-sampling Techniques

Sampling was primarily achieved via Reverse Circulation drilling.

Samples were split using a riffle splitter to ensure representative sub-sampling for assaying.

4. Estimation and Reporting of Mineral Resources

Ordinary Kriging was utilized for the Gold grade interpolation.

Cut-off grades were determined based on current economic assumptions and metallurgical recovery rates.
